

Crowdfunding Report:

**Just one step away
from completing their
basic education**

Quetzaltenango, Guatemala, C.A., February 2020

TITLE OF REPORT

Just one step away from completing their basic education

On this occasion we would like to thank all the people who have supported with their donation so that the young girls in Retalhuleu can complete their high-school education. With your donations, the girls were able to pay their monthly training fees, buy school materials and uniforms.

During this time, the schools where the girls are studying had been monitored to verify their legal registration. To date, 97% of the girls are studying. During this process, several girls were visited because they were not enrolled.

The group vitality from the Parcelamiento Santa Fé community is highlighted, since, knowing that the support will continue, they have committed themselves to: a) having good grades, b) attending classes every day and c) do their best to deliver great homework.

They want to express their gratitude to all donors: “Being on scholarship is a privilege that not all of us have, which gives us the opportunity to discover our potential and continue to make our dreams come true.”

Without your help, these achievements would not be possible and the vision of the young girls would be different, thank you for continuing to believe in them.
